

Professional Summary

Dynamic and highly accomplished solutions architect with a extensive expertise in AWS Cloud, computer vision, cyber security, US nuclear operations, refrigeration, and comprehensive application/product development. My extensive technical knowledge and exceptional track record in crafting innovative solutions across diverse fields uniquely position me to contribute to a forward-thinking organization. Driven by a passion for groundbreaking problem-solving, I am eager to join a team of skilled professionals who share a commitment to collaboration and excellence.

Core Proficiencies and Tech Stack

- | | | |
|--|---|--|
|  AWS Architect [Certified] |  Python [Certified] |  CloudFormation (IaC) |
|  AWS Security [Certified] |  React/TypeScript/JavaScript |  Computer Vision |
|  AWS Networking [Certified] |  PostgreSQL/SQL/Flux |  APIs/REST/Integrations |

Career Summary

AWS Solutions Architect

2024 – present

Computer Enterprises Inc. (CEI)

Company Description

CEI is a trailblazing, minority-owned strategy/technology company that empowers businesses to thrive by seamlessly blending bold insights with innovative solutions to stay ahead in a rapidly-evolving world.

Responsibilities

- » Design/develop AWS cloud solutions to solve problems small and large for both company and client.
- » Administration and security/cost monitoring of AWS tenant for company's AWS consultants.
- » Engage with, consult, and teach clients about AWS and suitable AWS cloud solutions.
- » Formally document cloud solutions to match client, AWS, and company expectations.

Tech Stack: AWS Cloud & Security Python PostgreSQL LINUX Azure Bicep GitHub Actions

Notable Projects and Achievements

- ✔ Designed serverless AWS solution for product license monitoring and reporting across SaaS products.
- ✔ Designed/deployed AWS solution for IAM auditing to maintain tenant security to support compliance.
- ✔ Obtained certifications in AWS Advanced Networking and AWS Security Specialty.

AWS Solutions Architect

2023 – 2024

Abacode Cybersecurity & Compliance Inc.

Company Description

Abacode combines advanced technologies/services to help businesses predict/prevent modern, sophisticated cyber threats while preparing them for strict compliance mandates.

Responsibilities

- » Pioneered, architected, and developed Abacode's first cybersecurity web application for use by clients.
- » Designed/developed entire architecture using ClouFormation (IaC with CDK/Python).
- » Engaged with VPs, directors, and managers to collaborate on Abacode's vision for client products.
- » Translated high-level requirements from management into project milestones (e.g., JIRA tickets).

Tech Stack: AWS Cloud & Security CloudFormation (CDK) Python React REST/APIs CI/CD

Notable Projects and Achievements

- ✔ Pioneered/architected/developed Abacode's first cybersecurity product to expand Abacode's service offerings.
- ✔ Collaborated with an international vendor to integrate its data products with Abacode's cybersecurity product.
- ✔ Obtained certification in Microsoft Fundamental Security Principals.

Software Engineer

2022 – 2023

Axiom Cloud Inc.

Company Description

Axiom Cloud makes cooling systems economically, environmentally, and operationally sustainable with IoT devices, AI modeling and remote device controlling mechanisms.

Responsibilities

- » Researched/developed time series data models best for refrigeration anomaly detection to autonomously discover issues among many IoT devices across many grocery stores in USA and Canada.
- » Worked in AWS to set up serverless services to facilitate the transfer of data from IoT devices to ML models for autonomous anomaly detection; programmed logic in Python.

Tech Stack: AWS Lambda/S3 Python ML (Time Series) Bash/Csh/PowerShell REST/APIs

Notable Projects and Achievements

- ✔ Pioneered solution to autonomously detect anomalous refrigeration behavior to scale detection by over 1000%.
- ✔ Obtained certifications in AWS Solutions Architect (Associate), Python (Associate), JavaScript, and C/C++.

Nuclear Engineer/Analyst and Software Developer

2015 – 2022

Fluor Marine Propulsion (FMP)

Company Description

FMP, with nearly 8,000 engineers/scientists/technicians across multiple facilities, has been developing the most advanced naval nuclear propulsion technology in the world since 1946.

Responsibilities

- » Trained US Naval Officers/Enlisted personnel to safely and strategically operate nuclear reactors.
- » Designed multi-lab, multi-language software to enable/support/monitor analytics *en masse*.

Tech Stack: MATLAB Python Analytics Tools (NUPAC/COBRA/MELCOR) Bash/Csh Nuclear

Notable Projects and Achievements

- ✔ Designed multi-lab, multi-language software to enable/support/monitor concurrent analytics *en masse*.
- ✔ Pioneered an improvement to an onerous government process for financial betterment and expedition of work.
- ✔ Certification in Naval Nuclear Operations (Top 10% of graduating class).

Education

- 2018 - 2022** **M.S. in Computer Science** (Clarkson University)
Publication: *Real-Time Hand Gesture Identification in Thermal Images*
- 2015 - 2016** **Nuclear Operations Certification** (Naval Nuclear Power Training Command)
- 2011 - 2015** **B.S. in Chemical Engineering** (Florida State University)
